## Christmas trees 1

**Age Group:** 6+

**Ideal Number:** 4-8 per adult

**Amount of Time:** Two forty minute sessions

The Christmas tree is formed by setting a twig into a small pot. These can then be decorated with small items. You could use other themes such as message tree . Each child writes or draws a set of messages which they then swap with others and hang on the trees or try making a larger tree with a picture of each member of the group on it.

To work out how much plaster of Paris to make up fill the pot to the required level with water. Pour this into the container in which you will mix the plaster, Old foil takeaway containers are ideal. Add the powder to the water stirring gently until the mixture is the consistency of double cream. Tap the mixture on a hard surface a few times to remove any air bubbles. Pour the plaster into the pot and place the twig in the centre. This must be held in place until the plaster begins to set.

The easiest way to decorate the pots is to cut paper to size and stick it on

Almost anything can be hung on the tree. Have a second session providing lots of paper, glue fabric scraps, old bits of tinsel old greetings cards etc. to make the decorations.

## Christmas trees 2

**Age Group:** 6-9

**Ideal Number:** 4-8 per adult

**Amount of Time:** 30 minutes

The Christmas tree is made form two pieces of card slotted together then decorated.

Cut two identical Christmas tree shapes from card. These can be very simple even just a triangle. Mark a line down the centre of each one. Make a cut along this line halfway up one tree and halfway down the other. Now slot the two shapes together. Decorate by gluing on scraps of coloured paper, tinsel and pictures cut form greetings cards.

## Advent calendars

**Age Group:** 6-9

**Ideal Number:** whole group

**Amount of Time:** 1-2 hours

/td>

Although these take a long time to make it is easy to split the time across several sessions. It is a good idea to have a list of ideas for pictures as it can be difficult for children to think of 24 different ones.

Cut a out a square of stiff card to be a template for the doors, about 3 cm is a good size. Draw around this 24 times on a sheet of paper and cut round three sides of each square with a craft knife. Now take a second sheet of paper the same size as the first one and place it underneath the one with the doors. Open each of the doors and draw in the square in pencil. It helps to hold the sheets together with a couple of paper clips. Depending on the abilities of your group the children may be able to do this themselves.

Decorate the front of the calendar with felt tips of paint and then draw a picture in each of the squares on the back sheet. Glue the two sheets together being careful not to glue the doors shut.

You could make these in a variety of shapes or make one large on between the whole group. You could either open all the doors since you last meeting or count down group nights till Christmas. The

children could split into groups to draw four pictures

---

## Firework pictures

**Age Group:** 6-10

**Ideal Number:** whole group

**Amount of Time:** 20-30 minutes

I used to make these pictures but I can't remember the exact details so I suggest that you try it out before doing it with your group.

Start by colouring a sheet of paper using wax crayons. Just colour sections of the paper in a variety of colours making sure that the wax is quite thick and that the whole of the paper is covered.

The next stage is to cover over the colours in black. I think you can do this by colouring over the whole sheet with black crayon but I also remember painting it. Add some PVA glue to thick black paint. Powder paint is best as ready-mix can be too thin.

Once the paint has dried you can create the fireworks. Gently scratch through the paint to reveal the colours. You could use a cocktail stick, pencil or even a worn out ball point pen.

---

## Pumpkin lanterns

**Age Group:** 6+

**Ideal Number:** whole group

**Amount of Time:** 2 \* 40 minute

sessions (need lots of adults for second session)

An alternative to hollowing out pumpkins **Do not put candles inside**

Start by blowing up a balloon and tying off the end. The bigger it gets the more work you have to do later so keep them fairly small. If you want to get the children to do it use a balloon pump

Tear some newspaper up into small pieces (about 3cm square is ideal) and mix up some PVA with water (about 2 parts glue to 1 part water). Now use a large brush or dip the paper in the glue and cover the balloon. Try to build up a few layers all over the balloon and make sure there are no holes. IT is best not to let the balloon get too wet. If an area does get wet stick some dry paper over it. Stand the balloon on an empty plastic container to stop it sticking to anything and leave to dry. This will take about a week

Once the balloon is dry draw on a face. These should then be cut out with a craft knife or small scissors. This is where you need all the adults as it can take some time. Young children need help in designing a face which can be cut out so you may want to give them some example faces. Also cut a hole for a torch, one on the bottom allows it to be held, one on the back allows it to be stood on a table.

Finally paint the balloon orange and when dry put a torch inside.
